aero's quest

This game is far away to be a masterpiece but at the end of the day gets the job done. It has some very good moments and overall is an ok game.. This game is so cute! I like the style, the cuteness of the characters and then the splatter once you die. Aero's Quest is challenging, I don't know if it is because I'm not really skilly with plaformers or because the game is hard. I like the idea of many short levels, it keeps the pace very high.. Graphics: 6/10 Sound: 9/10 Game-play: 7/10 Controls: 7/10

Replayability: 8/10. Aero's Quest is one of those games that you need to get into it to totally appreciate it. In the very first beginning I was skeptical and I was thinking for the worse. Then, after the tutorial, the game hooked me and I found it very entertaining. The graphics are simple but not outdated with some nice touch here and there. The sound is beautiful, I'm a musician myself and I love all the tracks of the game Mechanics are simple but are working well and generally the game, despite the challenge, hooks you up.. Aero's Quest surprised me. I bought it on sale and I wasn't 100% sure since the graphics are not the best and few reviews were negative. I started to play it and after a while the game really drove me crazy (in a positive way), I just couldn't stop to play. And I keep on playing it. Very positive surprise this title.. Aero's Quest is one of these titles that the more you play it the more it gets better. The very fist impression might not be the best: everything looks fine but nothing really stands out. When you start playing it seems a very simple and generic platformer until the game starts to kick. The very first zone is just a tutorial and the second zone (a variation of the first forest) brings out more the platformer part rather than the puzzle part. When you get in the 3rd zone instead (the volcano) everything starts to change: you see new obstacles, the levels are not linear anymore and few more puzzles are coming out. The game is a big "crescendo" till the 5-6 zone (where I got so far) where puzzles and platforms are mixing in a great way. Aero's Quest is hard, very hard: one of the most challenging games of the year and it is long, very long: 101 levels to play in two different modes. I have to mention the sound: it's awesome! Every zone have its own music and they are all very good. If you pass the first 10 minutes and the first 20 deaths Aero's Quest can be really a big surprise.
